ALE has been involved in the manufacture of Functional Topographic surfaces for more than 30 years. This privately owned company has provided leadership through innovation in the sector of laser engraving machine manufacture. These machines are used to place micro-textures onto rollers. To date, ALE has supplied more than 350 systems worldwide. Our machinery is used in an extensive range of industries having the commonality of requiring laser engraved microstructures to provide value and function through topography.

Laser engraved Functional Topography describes a surface that has functionality provided to the surface by the laser. This functionality could be to hold ink, for Flexo, Gravure or Anilox rollers, or to create a surface used for embossing or imprinting a substrate. Printed electronics, optical films, anti-microbial and low-friction surfaces are further examples of Functional Topography.

Construction of Batı Kipaş Paper Industry and Trade Inc. began in 2017, and the facility became operational in 2021. Built on a total area of 550,000 square meters, including 250,000 square meters of enclosed space, our plant significantly increased its capacity in 2025 with the commissioning of the PM3 production line. With this investment, the facility has expanded to 620,000 square meters in total area, with 300,000 square meters of indoor space. Considering the range and volume of products it manufactures, our facility is one of the largest paper mills in Europe, with an annual production capacity of 1,300,000 tons.

FADERCO – A Leading Algerian Industrial Group

Founded in 1986, Faderco is a leading Algerian industrial group specializing in personal care, hygiene and tissue products. Built on a strong foundation of innovation and industrial expertise, the Group has expanded its activities to include baby care, feminine hygiene, adult care and wiping solutions, through its well-established brands, including Awane, Bimbies, Uniform and Cotex.

In 2015, Faderco marked a major milestone with the launch of WARAK, Algeria's first industrial facility dedicated to the production of parent reels of pure cellulose tissue. Through continued investment, technological development and production capacity expansion, the Group has strengthened its position in the tissue and hygiene industry while pursuing growth in international markets.

Today, Faderco is committed to delivering quality, innovation and sustainable growth, reinforcing its ambition to become a key player in the global paper and hygiene industry.

Paper Converting Lines and Much More

Our philosophy is tailor-made. Over 150 years in business, we have learned to create technologies that meet the end consumer's need for well-being.

We have created converting lines, both professional and consumer, that are assembled to suit each customer's needs. We have also invented individual components that can transform existing lines.

Our technologies are tailor-made, and they are always high quality, because well-being depends on quality. That is exactly what we do in our TissueHub, our ideas lab: we test combinations of our machines to make sure every stage of production meets our quality standards.

Key figures:
·200+ employees
·Founded in 1870
·€50+ million turnover
·205+ lines installed

Our Leadership
The Gambini family has always led the company and is now in its fourth and fifth generations, with Giovanni and Gianni. Thanks to the dedication of the Board of Directors and more than 200 employees in Italy and the United States, Gambini has become an extended family.

GIOTTO TECHNOLOGIES SRL

Web: https://paperlinkintl.com/company_profile/

Contact: Urvashi Patel / Executive Assitant
Mobile: +971556739323
Email: ea@paperlinkintl.com

In the year 2000, Paper Link International was established in Jebel Ali Free Zone, Dubai (U.A.E.). The Managing Director Mr. Saifee Jani and his team felt a huge gap in the waste paper trading industry of that region and saw the potential of diversifying into that industry. Paper Link is now an established trading company in paper & paperboard and recovered fiber for recycling, known for its excellent service and unrivaled ethic.

Paperlink's growth has been exemplary. What started as selling waste paper from their Dubai office, slowly spread to other sourcing points such as Europe, UK, African, and Middle Eastern countries. The real game-changer was 2005 when Paper Link International was established in the USA for sourcing various grades of waste paper and supplementing activities of Paper Link International Dubai in supplying waste paper to Indian paper mills.

We are truly a one stop solution to all needs in the paper industry. We are considered experts in the field of "jumbo roll" manufacturing, as we produce the best selection for companies that use these raw materials to convert them into consumer products. We are also the industry leader in consumer products, offering a wide range of products to meet the everyday needs of consumers. Our products in this regard include facial and pocket tissue, toilet tissue, kitchen tissue, maxi rolls and other products related to paper products.

We are currently operating at maximum capacity for manufacturing, conversion, and recycling.

The company has the strength and ability to supervise the entire paper production cycle in its factory – starting from the manufacture of "jumbo rolls" to the tissue

The Saudi Paper Converting Company was established in 2001 to produce a variety of consumer paper products.

Our manufacturing process enables us to provide a wide range of our products to the market and to large companies every year, with a manufacturing capacity estimated at 40,000 tons annually, with continuous development of machines to increase production capacity and improve the quality of the final product to keep pace with development according to market variables, using the latest machines from the world's leading suppliers in this field. This includes our production of large tissues that are used as raw materials that are eventually converted into consumer products such as facial, kitchen and bathroom tissues, in addition to other types and classifications of paper tissues that bear the brand names of Mouchoir, City, Excellence and SPC Pro.

Our expertise and advanced capabilities in the field of converting and manufacturing paper helped us achieve the highest quality standards in the local and global markets, as internal quality assurance processes are integrated for each product that comes out with the company's trademark, which will build trust with the customer and win his loyalty

Universal Tissue Machine Company (UTM) is a premier Taiwanese engineering firm and machinery manufacturer specializing in high-performance, automated tissue converting solutions. UTM designs and builds highly reliable production lines—including advanced V-Fold interfolds, high-speed log saws, automatic accumulators, and sophisticated unwinding systems. Known for combining rugged, low-maintenance mechanical construction with state-of-the-art European and global automation standards, UTM serves the global paper conversion industry by delivering high-throughput, turn-key manufacturing assets that lower total cost of ownership (TCO) and maximize Overall Equipment Effectiveness (OEE).

Core Engineering & Technical Skills

High-Speed Web Handling & Tension Management: Proven expertise in engineering dual driven unwinders with integrated dancer roll closed-loop tension systems, ensuring stable paper feeding up to design speeds of 300m/min.

Precision Vacuum Distribution Engineering: Advanced capabilities in designing high-efficiency vacuum systems utilizing multi-pump configurations, rotating joint manifolds, and proprietary central vacuum roller channels to prevent pressure loss during high-speed operations.

Modular Mechanical Design: Skill in manufacturing modular folding roll suction components and rapid-change assemblies that allow factories to quickly adapt production lines to diverse paper grades, thicknesses, and breathability profiles.

Liuzhou ZODE Machinery Sci-Tech Co., Ltd. is a national high-tech enterprise specializing in the R&D of intelligent, automated complete production lines for the tissue industry. With a modern 23,000-square-meter production base, the company provides global customers with stable, efficient, and intelligent tissue production line solutions. We are more than an equipment manufacturer; we are your end-to-end partner, supporting you from plant planning and equipment selection to installation, commissioning, and after-sales maintenance.

Our product portfolio covers complete production lines for tissue products such as facial tissues, toilet rolls, hand towels, and napkins, encompassing folding/rewinding, slitting, packaging, case packing, palletizing, and intelligent logistics and warehousing. Compatible with a wide range of products—including soft-pack and boxed facial tissues, kitchen towels, toilet rolls, and mini-jumbo rolls—our solutions help customers achieve lights-out factory operations. We also provide auxiliary equipment and custom-engineered solutions based on customers' paper specifications, packaging formats, and automation requirements, enabling one-stop procurement, reducing coordination with multiple suppliers, and improving overall line efficiency.
